LATE ARRIVALS.

You are often made the victim of mosquito bites. Call at Hobrons' and ask for "Skeet-Go" they will explain its use, and guarantee its effect.

As to ZENOLEUM

The Kamebaccha Schools, Agricultural Department, report as follows:

"Our most stubborn case has been that of the farm horse, an old gray more, so budly infected with the mange that hurdly a square foot was free from infection, large biotehes on her face, belly and legs were constantly kept raw. It is now three months since beginning treatment with Zenoleum, and although not entirely cured, most of the old sores are bested and much of the bare spaces are becoming covered with hair, perhaps for the first time in years. I consider this a fine example of the worth of Zenojegus in the treatsmoot of our most annoying house disease in these islands, but it has required thorough and persistent treatment, and I would have no one believe that half-hearted measures will result in anything but disappointment.

"As a cowepray (solution 'C') we find Zenoleum quite as effective as a fly preventive as the several expensive preparations used beretorce, and at about one-tenin the cost,—a very important item where large herds of dairy cows are kept. In this connection I might add that the spray is likewise effective in keeping away the mosquitoes which are very troublesome about unscreened herse stalls, and are probably in a large part responsible for the transmission of the mange from one animal to another. We intend using it now freely for this purpose hereafter."

For curing Mange and killing Ticks and Fleas on dogs, nothing can equal

We have a good stock of Lenoleum on hand.
